

Configuring SMU VPN for MacOS

Introduction

The SMU Virtual Private Networking (VPN) service allows SMU faculty, staff and students to access secure SMU network resources while connected to an outside ISP.

Changing Security Settings to Allow Installation (10.8 or Later)

1. Select **Apple10.5 (jogo/TT1 1 T0 0 Tc 0 Tw 2.772 EMC /LBody </MCID 6 >>B10E1w 0.2910E1w**
6. Click Connect
7. When prompted, enter SMU as the domain
8. Enter your SMU ID and password.
