

Response to Reading Intervention by Students with Low IQs

Jill Allor

Tammi Champlin

CEC April, 2009

Dept. of Teaching and Learning
Institute for Reading Research
Southern Methodist University

Multi-Site Research

f Research is funded by Institute of Education Sciences (IES)

f Coordinated with other research projects

f University of North Carolina – Charlotte

f focus on moderate and severe cognitive disabilities

f Diane Browder and colleagues

f Georgia State University

f focus on mild disabilities

f Rose Sevcik and colleagues

Research:

Reading and Intellectual Disabilities

- f* Clear evidence for effectiveness of sight word instruction
- f* Minimal research on phonics instruction
- f* Throughout the literature...

Browder et al., 2006

- f* Meta analysis of 128 studies including students with moderate and/or severe intellectual disabilities
- f* Strong evidence that systematic instruction can lead to reading sight words, though most studies were small in scale.
- f* Only one phonics study was strong in both quality and effects

Research Questions

- f* Are *reading interventions* that have been proven to be effective with students who are very low readers also effective for teaching students with *intellectual disabilities or IQ scores in the borderline range*?
- f* What *level of reading competence* can be achieved by these students with the use of these interventions across several years?

Research Design: 4-year Plan

10 Elementary schools → Move into Middle school

Condition	Year 1 2005-2006	Year 2 2006-2007	Year 3 2007-2008	Year 4 2008-2009
Reading Intervention	67 Students Grades K-3	65 Students Grades 1-4	60 Students Grades 2-5	57 Students Grades 3-6
Contrast	58 Students Grades K-3	54 Students Grades 1-4	45 Students Grades 2-5	41 Students Grades 3-6

Participants

f

Intervention

- f* Comprehensive, explicit, systematic phonics-based reading program
- f* Implemented daily by research teachers
- f* Instructional Sessions
 - f* goal: 45- to 50-minute sessions
 - f* actual: 40- to 50-minute sessions
- f* Students taught in groups of 1-4
- f* Average length of time in the study approximately 2.7 years (range 2-3 years)

*Curriculum: Critical Features

f Explicit and Systematic

f Explicit strategies

f Cumulative review

f Careful sequencing

f Scaffolding

(gradually reduced)

f Comprehensive

f Fast-paced

f Immediate Feedback

f Teaching to Mastery

f Increased Opportunities to Respond

**Early Interventions in Reading, Published by
SRA/McGraw-Hill*

Annual Measures

f Language

f Expressive Vocabulary Test (EVT)

f Peabody Picture Vocabulary Test (PPVT)

f Selected subtests of Woodcock Language Proficiency Battery-R (WLPB-R)

f Selected subtests of Test of Narrative Language (TNL)

f Phonemic Awareness

f Comprehensive Test of Phonological Processing (CTOPP)

f Reading

f Test of Word Reading Efficiency (TOWRE)

f Selected subtests of WLPB-R

Progress Monitoring Measures

f Dynamic Indicators of Basic Early Literacy Skills (DIBELS)

f Phoneme Segmentation Fluency

f Nonsense Word Fluency

f Oral Reading Fluency

f Data will be analyzed using Hierarchical Linear Modeling

Year Three Results – Annual Measures

Summary of Findings

f students with IQs in the moderate range who participated in the treatment significantly outperformed similar peers on virtually all measures

f students with IQs in the mild range who participated in the treatment performed similarly to peers in the contrast group

f on most measures, students with IQs in the moderate range, on average, made gains similar to students with IQs in the mild range

Progress Monitoring Results for Students with Mild ID (as of March 09)

f PSF

f 10/20 met benchmark of 35

f (other scores: 29, 11, 8, 24, 9, 14, 10, 16, 17, 29)

f NWF

f 8/20 met benchmark of 50

f (other scores: 23, 12, 23, 34, 27, 13, 27, 28, 5, 15,
25, 47)

Progress Monitoring Results for Students with Moderate ID

f PSF

f 7/16 met benchmark of 35

f (other scores: 30, 7, 10, 33, 23, 34, 20, 23, 15)

f NWF

f 7/16 met benchmark of 50

f (other scores: 47, 14, 37, 10, 38, 34, 35, 7, 30)

Progress Monitoring Results on Oral Reading Fluency

f Students with Mild ID

f 8/20 met first-grade benchmark of 40

f Mean 46.65 (range 162-1))

f Students with Moderate ID

f 7/16 met first-grade benchmark of 40

f Mean 38.38 (range 99-3)

Results: Current PI 0.0emt 5pin the

Halfway through Level One Students...

- » Identify most common sound for all individual letters
- f* Read words made up of those letters
 - f* Ex: last, mom, slip, step
- f* Apply basic comprehension strategies
 - f* Ex: retelling, sequencing events, story grammar

Jeffrey's Journey

David Burdette

Jeffrey is a student with ID #1111

Jeffrey's journey began in 2005 when he was diagnosed with a learning disability. His parents, David and Susan, were determined to provide him with the best possible education and support.

Jeffrey's progress has been monitored closely by his teachers and parents. He has shown significant improvement in his reading and writing skills over the past few years. His current reading level is at the 4th grade level, and he is able to write simple sentences and paragraphs.

Jeffrey's Progress Monitoring Data
2005-2006 2006-2007 2007-2008 2008-2009

Conclusions

f students with ID, even those with IQs in the moderate range, can learn basic reading skills given consistent, explicit, and comprehensive reading instruction across an extended period of time

Conclusions

- f* It takes a long time, but techniques effective for those with reading disabilities are also effective for students with ID.
- f* Instruction must be individualized, especially with regard to pacing and behavior management.
- f* Recommended Resource: *Teaching Word Recognition to Struggling Readers* by Rollanda O'Connor
